

# HOW MUCH AIR SHOULD BE PUMPED INTO THE BOARD

The recommended pressure is marked on the valve rubber patch of each chamber of the board.

Any higher you risk over-inflating and damage.

RECOMMENDED **15 PSI**  
INFLATION **1.0 BAR**

WARNING: KEEP UNDER SHADE WHEN NOT IN USE  
WITH A WORKING PRESSURE LESS THAN 10 PSI.

DEFLATE • LIFE VEST RECOMMENDED •  
INFLATION 10PSI/0.68BAR • RE
