

HOW TO DEFLATE THE STAND UP PADDLEBOARD

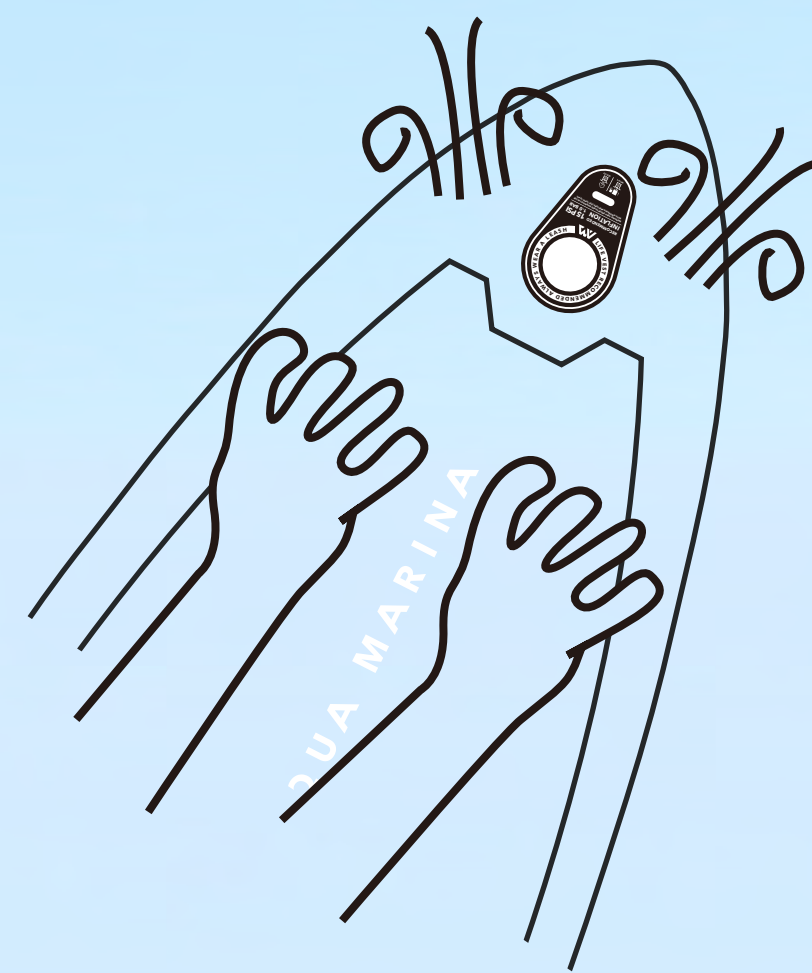

2

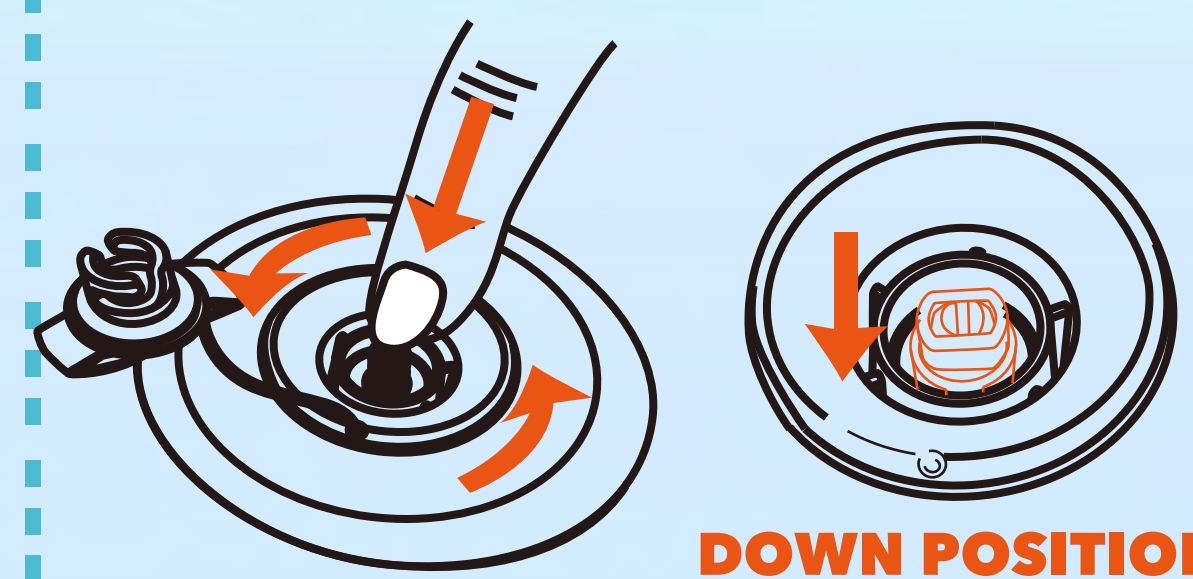

Roll the board around the pump or simply roll up the board from nose to tail.

3

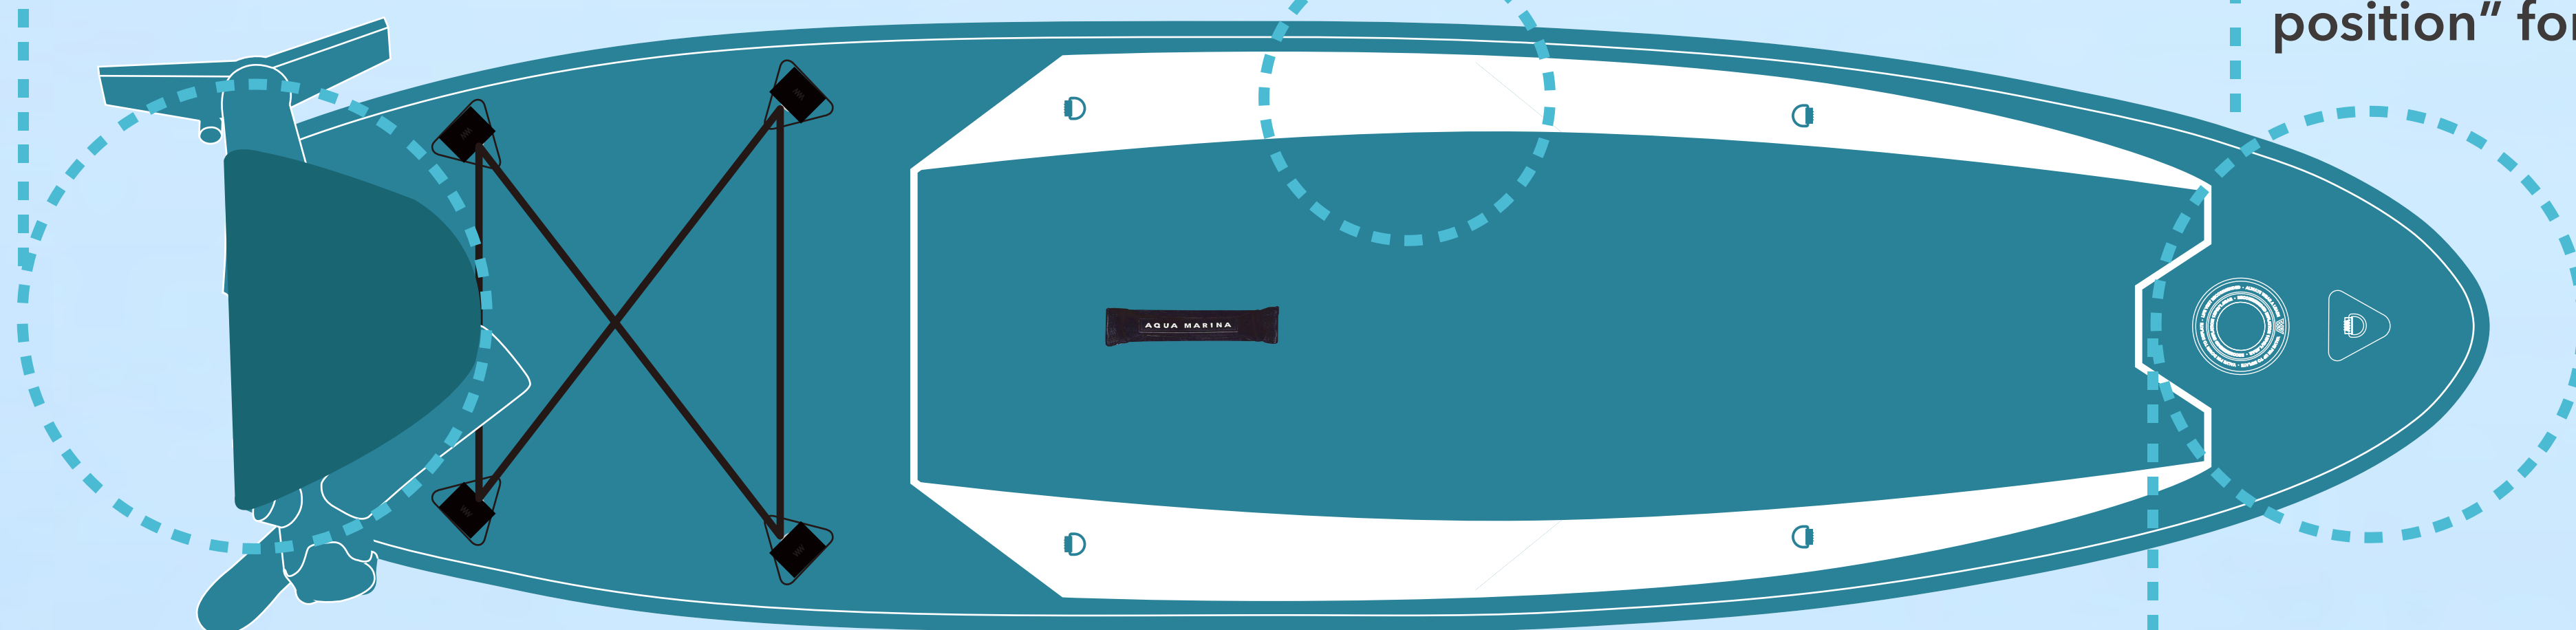

Press all air out of the board as you roll.

1

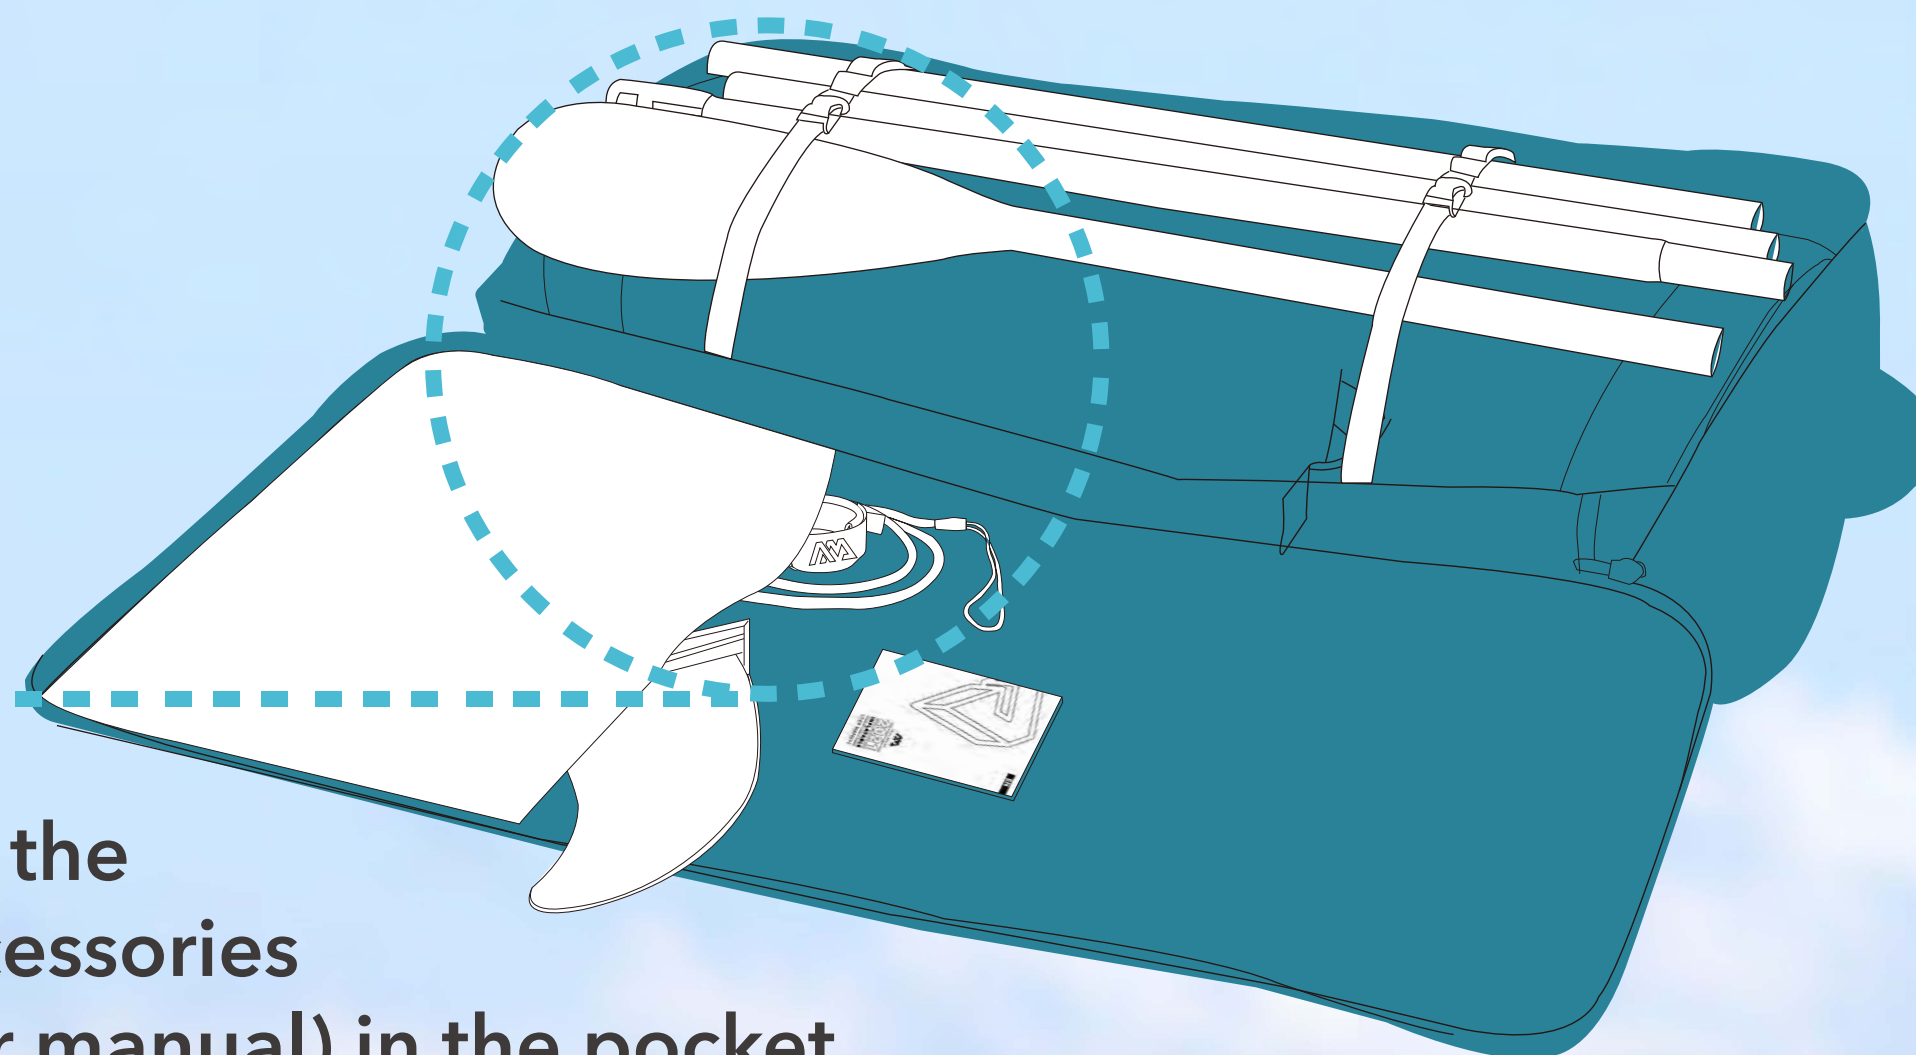

Push valve button in and turn clockwise to lock it in "DOWN position" for deflation.

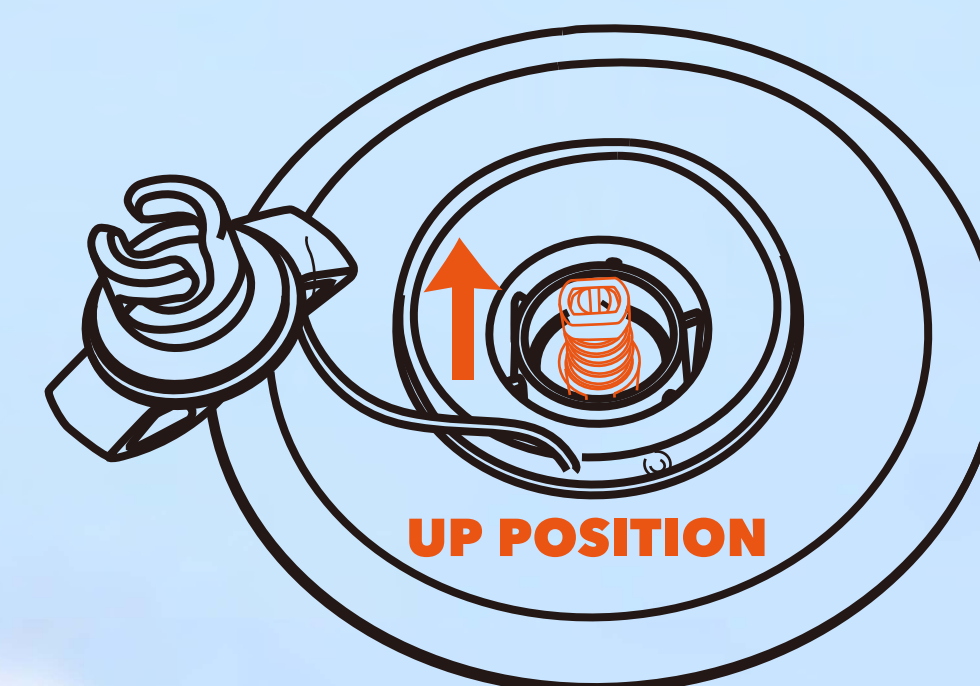

5

Secure paddle on top of the board, and place the accessories (fin, leash, repair kit, user manual) in the pocket.

4

After complete deflation, lock the valve button in "UP" position, and close the valve cap.
