

HOW TO TAKE CARE OF MY INFLATABLE BOARD

DO'S

CLEANING

Clean the board after each use with freshwater and mild soap.

KEEP IT DRY

Dry the board after each use, especially before storing to avoid mould damage.

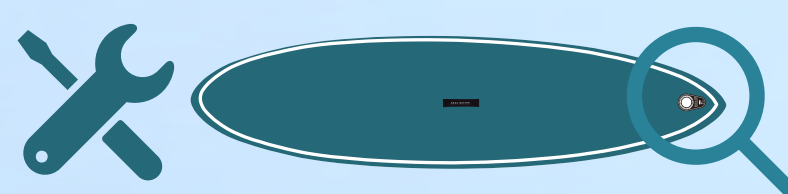

FREQUENT USE

Use the board frequently as long-term storage may cause adhesive failure.

REGULAR MAINTENANCE

Regularly check for cracks, scrapes, or any other issues and repair if necessary.

DON'TS

DON'T USE AN AIR COMPRESSOR

You can easily over-inflate the board by using an air compressor and void the warranty.

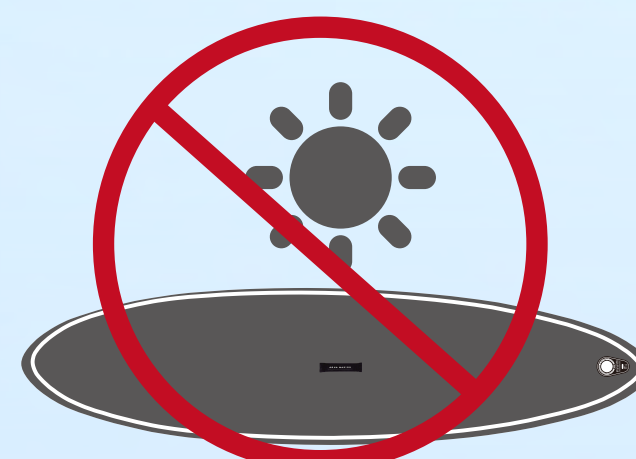

NO DRAGGING

Don't drag the board as sharp debris may puncture it.

AVOID DIRECT SUNLIGHT

Keep the board under shade when not in use with a working pressure less than 60%-70% of the max. air pressure.

AVOID TEMPERATURE EXTREMES

Keep the boards sheltered away from temperature extremes and humidity. Store at room temperature between 0°C - 40°C.
